The Microlite

This is the ultimate Class 1 Industrial stand-off that instantly secures ladders at the top before climbing up. The Microlite is particularly suitable for painting and fitting trades.

Unlike most stand-off devices the Microlite, due to its innovative design, can stay attached to extension ladders even when they are fully closed.

The Microlite utilises 'D' wheels which deform when under pressure to provide a secure contact with any surface.

The Microlite also provides a unique roof access system.

- 'D' Wheels
- Higher reach and safe handhold
- Roof access system
- Quick fitting
- Single-piece design
- Fits timber or aluminium ladders
- Lightweight.
