## The Stairmate

From simply changing a light bulb to major decorating or maintenance task, Stairmate provides safe and cost effective access.

Stairmate is a unique device enabling both the professional and DIY user access to those awkward areas above stairs and steps using any conventional ladder.

- Fully adjustable for all stairs and steps
- Takes only seconds to set up and move
- Much cheaper than scaffolds
- Folds away into a compact unit
- Unmatched simplicity
- Light and portable
- Maintains access

From simple access in the home to professional use in offices, hotel, shopping malls, public buildings, airports and railway stations. Stairmate provides distinct advantages over existing methods.
